

PID - 104/64
16 June 1964

MEMORANDUM FOR: Executive Director, NPIC
FROM: Chief, CIA/PID (NPIC)
SUBJECT: In-House Graphic Capability

1. Members of the CIA/Photographic Intelligence Division (NPIC) continually strive to provide more responsive and higher quality analysis in support of requesters. The quantity of illustrative materials to support these analyses has continued to increase until it is now consuming a large portion of PI effort which could better be utilized in analysis. To date we have been successful in balancing the quality of material presented commensurate with requirement due dates. However, we feel that the addition of one qualified graphics man responsive to the needs of our substantive branches will greatly enhance the quality of our illustrative material and free the PI for more substantive endeavors which are in critical short supply at this time. We need a man working within the branch areas preparing line drawings, briefing board mock-ups, photo annotations and some minor amount of illustrative sketching. This work will be at the direction of individual analysts.
